

ABLE

TL;DR Summary

- Plain English Business Rules Engine
- Use your Business's Terminology
 - Your language, not ours
 - Create terms that fit your purpose
- If “this” then “that” programming
 - If “On hand parts” < 100
 - Then “Order more parts”
 - ^ an actual business rule in ABLE
- Your logic becomes code
 - No telephone game
 - No interpretation
- Simple to Use
- Customizable Interface
- Testable Rules
- Faster than other BREs
- Infinitely Stackable Rules
 - Rules can change values for other rules
 - If “On hand parts” < 100
 - Then “Next Order = Next Order + 100”
 - Could be run alongside a rule like
 - If “Next Order” > 200
 - Then “Request Delivery from Vendor”
- Complex Rules Supported
 - And/Or are words you use after all!
 - If “On hand parts” < 100
 - And “Parts to complete current orders” > “On hand parts”
 - Or “Days until next delivery” > 30
 - Then “Order more parts”
